

Software Solutions for Exploration Drilling

Your data, like other precious resources, has greater value when surfaced.

KruX is an enterprise-level, easy-to-use software platform that helps you capture, review, and analyze your data, so you can drill down with pinpoint accuracy. That secure data acts as a shared, single source of truth, bringing you increased visibility, automation, and real-time predictions.

We empower your business to manage data in real-time and optimize decision making.

Proven Track Record.

We have been trusted by our customers to track over **2 million meters drilled** across 115 different sites worldwide. That's over 0.5M drilling hours and 1M man hours.

Superior Service.

We know every minute matters, so we offer on-demand, expert customer support.

Robust Integration.

Flexible and seamless integration ensures you can leverage data from all systems with KruX.

Easy Implementation.

Rapid onboarding with the support of our team.

Turn to KruX, we turn information into insight.

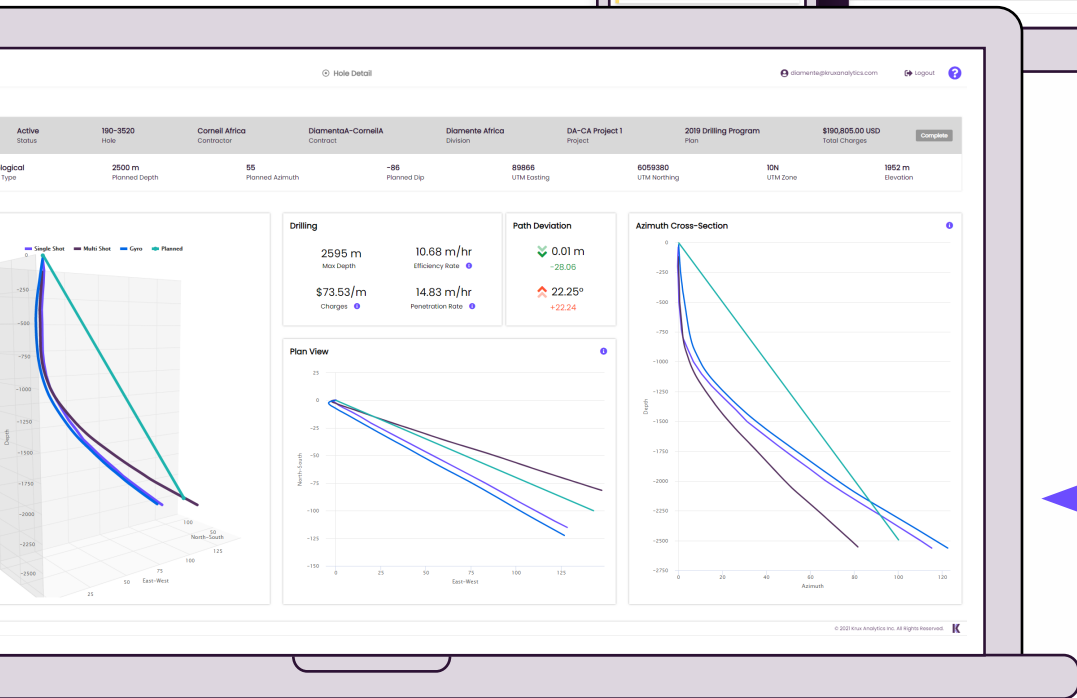

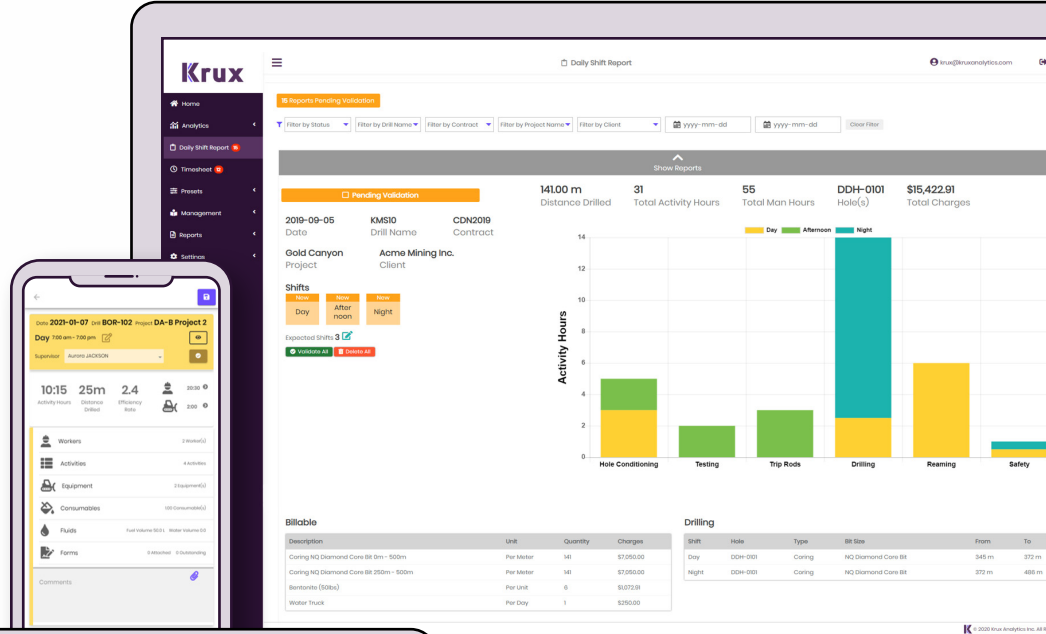

“We know drilling and we know data. Krux’s overlapping expertise allows us to meet our clients’ business needs today while helping them evolve for the future.”

— Jody Conrad, Founder/CEO
